Full-Stack developer with 3 years of experience mainly in TypeScript, React, Node.js, and NestJS. My work spans frontend, backend, system design, cloud infrastructure, and AI-assisted development. Additional 2 years of testing and technical support experience adds a practical focus on quality and troubleshooting.

PROFESSIONAL EXPERIENCE

Bannerse - Full-Stack Developer

Oct 2025 - Sep 2026

- Led much of the technical development for a multi-tenant content management and visual experience-building platform.
- Developed features end to end across frontend and backend, built the platform's Cloudflare infrastructure, and implemented product analytics with PostHog.
- Used AI coding tools throughout development and created reusable skills for AI models to enforce engineering rules, preserve application knowledge and keep documentation consistent.

Freelancer - Web Developer

Feb 2025 - Jan 2026

- Built and maintained responsive client websites, adding features and improving performance alongside full-time employment.

Dolphio Technologies - Full-Stack Developer

Sep 2023 - Oct 2025

- Built a TypeScript/Webpack browser extension with a NestJS backend and React frontend.
- Contributed to system design and technology choices.
- Maintained e-commerce plugins on Google Cloud supporting retargeting and marketing use cases.

I-Cell Mobilsoft Zrt. - Software Tester

Apr 2020 - Jun 2022

- Tested web applications using manual methods, test planning and design, and Apache JMeter.
- Supported API implementations, investigated issues with developers.
- Interviewed, onboarded, and mentored colleagues.

EDUCATION

CodeCool

Jun 2022 - Oct 2022

Frontend Developer bootcamp

Budapest Business School

2017 - 2019

Business Informatics - Higher-level vocational training
